**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 6 is objected to because of the following informalities: Incorrect use of a trademark in a claim. The term "Velcro" should not be used in a claim, but rather a synonymous term should be used such as hook and loop tape. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Fairchild (U.S. 2,149,210). Fairchild shows an ear and neck protector having two ear covering portions for both the left and right ears. The neck protector is a flexible covering in a preset form, which is connected to the ear covering portion allowing a person's ears and neck to be protected during the hair dyeing process. The ear covering portions are formed with an ear shaped hanger (Figure 4), which are connected to a covering member. The ear covering portions are covered by flexible material and are able to be positioned around the outside of the user's ears (Figure 1).

Art Unit: 3765

Fairchild also shows a protector that can be made from any suitable material (Column 1, 47) such as plastic, paper, non-woven fabric, and fiber.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fairchild (U.S. 2,149, 210). The device of Fairchild does not specifically state that the ear hanger and covering members are connected by adhesion, releasable fasteners, or high frequency soldering. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the device of Fairchild as a single piece constructed unit for ease of operation. The use of adhesion, releasable connectors, or high frequency soldering are considered equivalent in the art.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ruth (U.S. 4,914,754) shows a disposable cap and cape for chemical processing of hair. Bills (U.S. 2,446,122) shows a neck and ear protector used to protect against the discomforts caused by the heat of hair driers.
